- the main activity of the our company is the supply and trading of various steel plates up to a width of 4.5m and various thickness,high strength and unique in the middle east,which has tumed this company into one of a rare supplier of this product worldide and,today on the path of growth and excellence,we supply plates in partcular dimensions and properties to meet the needs of our cliental
- our company is supply plates have a range of applications:oil and gas pipelines,pressure vessels and big storage tanks of chemical and petroleum fluids,ship bulding industry,industrial and power plant boilers,huge metal structures and bridge construction which are part of industrial products that use the Jahan Asin Sepahan company is steel plates.

- supply and consumption of steel is today is world is considered one of the main indexes of development of countries.presence of steel industry in a region influences the process of development,culture,knowledge level,employment,reaserch,training and commerce of that region

- humanity is daily life is intertwined with steel and steel industry plays a signiicant role in construction, rebuilding development of a country.steel srtructure and obviation of country is industrial strategic needs which indicates the immense influence of the steel industry on country is growth and prosperity

Application:

- Oilm,gas pipelines,water pipelines
- Casing pipes

Features:

- Low carbon,sulfur and phosphor contents
- Suitable strength and toughness
- Clean steel
- Microally steel such as Nb,Ti/V Resistant to corrosion and SSCC/HIC tests
- Suitable amount of DETT
- Thermo mechanical rolling

Mechanical properties:

- High strength
- Suitable toughness in low temperatures
- Good weldability
- Resistant to corrosion and SSCC/HIC tests

Delivery conditions:

- As rolled
- Thermo mechanically controlled

Structural Steels:

Plates for general structural purposes

ST37-3 , ST44-3 , ST52-3 , ST50-2 , ST60-2 , ST70-2 , S235 , S355 S450J0 , A283 , KR A-E

Plates for normalized structural steel

S275N , S275NL , S355N , S355NL , S420N , S420NL , S460M , S460ML

Plates for thermo mechanically rolled structural steels

S275M , S275ML , S355M , S355ML , S420M , S420ML , S460M , S460ML

Structural steel plates with improved corrosion resistance

S235J0W , S235J2W , S355J0WP , S355J2WP , S355J0W , S355J2W , S355K2W , A588
